Chapter I

General rules

Read first the subject of the main project!!

The projects "Duration" and "Contract upload" do not require to do any action; you should create a contract on the companies site of the intra, wait for validation and update the contract. Once that is done, both projects will be automatically validated.

Important points to consider:

- Create and upload your contract **BEFORE THE STARTING DATE**.
- Make sure that the contract starts at least one week after the day you upload the contract else your contract is not valid.
- The mark of the "Duration" project will be from 100 to 125 depending on the duration of the startup experience. If your startup experience is 4 months-long, your mark will be 100. For 6 months, you will get 125. This will impact your final mark for the startup experience.
